

ECONOMIC GROWTH IS EVERYONE'S RESPONSIBILITY.

Fibre Processing & Manufacturing Sector Education and Training Authority

› Connecting › Mentoring › Training

**WE CORDIALLY INVITE
ALL STAKEHOLDERS....**

The Fibre Processing and Manufacturing (FP&M) SETA will be hosting the Skills Career & Development Summit and Expo, which will take place at the UNISA Conference Centre on 14 & 15 September 2017. Over 1500 High school learners from Grade 10-12 will be hosted for two days where different skills and career paths will be showcased, allowing them to engage with experienced and knowledgeable individuals within the different sectors.

The summit will be providing different funding opportunities and learnerships as funding is one of the obstacles that many young people face when it comes to higher learning, education and training. A series of Focus sessions in partnership with the government and you as private sector will be hosted; giving these young people a platform to interact with established individuals and companies investing in Graduate development and placement.

As a valued stakeholder we request your company to come and exhibit at this conference at no cost to you. We want our learners to experience the culture of your companies as preferred companies to work for.

DATE: 14-15 September 2017
VENUE: UNISA Centre, Ormonde
COST: No cost to SETA Stakeholders
RSVP: rsvp@fpmseta.org.za
